

Universal Health Care Platform for Caucuses

The health of Coloradans is essential to the strength of our state. We believe government policies should “promote the general welfare and secure the blessings of liberty to ourselves” as written in the opening lines of the Constitution of the United States. We believe, as a matter of social justice, that health care for all in the United States is a basic and necessary human right and should be considered a public resource, not a commodity. Access to excellent affordable health care serves the common good.

Universal access to necessary medical services focused on preventive measures is required to preserve freedom, opportunity, and the ability to be productive. We support a high quality universal single-payer health care financing system at the state and or national level that is independent of employment and focuses on the health of Coloradans first and foremost.
